## Poleadion

Seats	Price	Size	MQ	Dance Floor	Evening Guests	You Save
170	£4,000	(60x60ft/18x18m)	P60	20x24ft	+50 (220)	£187
240	£5,000	(60x80ft/18x24m)	P80	20x24ft	+80 (320)	£309

Poleadion package with dandy dura matting, Par56 centre pole lightes & dimmer, festoon lights, dance floor & furniture. If you have allot of extra evening guests we recommend adding a 20x20ft Matrix (M20) entrance marquee, this will make the space more comfortable.

Each package includes the marquee, flooring, lighting, furniture and a wooden dance floor. The furniture is the white bistro chair and 5'6 round table (seats 10 per table). You can change the style of chair or table to suit your event, but this will change the package. Please let us know and we can revise the quote accordingly. Except the White Bistro all other chairs are sub-hired and will be charged at their full rate. All items are hired whether used or not.

Prices shown include 20% VAT.

Delivery charges apply, see website prices page to calculate the delivery charge (minimum £30 delivery).

Unless prearranged the hire date is for 1 day (24hrs). For longer charges may apply. We will deliver 1-3 days before the hire date, and collect 1-3 days after.

If you require a catering tent we recommend the 20x20ft Matrix (M20). With the Poleadion we can also supply a 20x20ft Entrance.

For more ideas look for the 'Accessories' file on the resources page of the website.

Electrics are not included as power requirements vary greatly. Once we have discussed your needs can we advise on the correct power supply/cabling you may need. As standard the lighting supplied in each package already comes with a 20m extension cable to 13/16A socket.

The site must be on grass which is flat and level. For larger marquees we need direct access for our vehicles. There should be no overhanging trees/cables and any underground services must be reported and shown to us, either by a plan or marked out. It is important to know in advance if the proposed site has allot of large rocks in the ground. For larger marquees we need a soil depth of 1m to fix the stakes. Shallow soil with rocky ground can prevent installation.

Is the site exposed, by the sea or is it sheltered and further inland?
