www.devonpartymarquees.co.uk

With its recognisable smooth peak, the **Matrix** is our only clear span marquee. Available in three sizes, the Matrix combines traditional tent design with modern innovation, creating an architecturally impressive, yet fully functional, structure system. Because of its versatility, the Matrix is an ideal choice for a wide range of event applications. From entrance porches, to catering tents, market stalls or eye-catching hospitality, this type of marquee will impress whatever the event.

IKADAN

IKA Floor is a modular interlocking flooring solution that forms a solid base layer to the marquee.

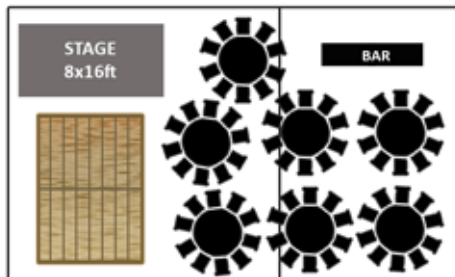

Use Ika Floor on its own at shows or events which are prone to soft and wet ground. Or combine with a new carpet in a colour of your choice, to create that luxurious feel for a wedding or special occasion.

This is not a raised floor, it follows the contours of the ground. The site must flat and level to install.

Most events will use a matted floor.
